

ChangeTracker[™] is an IBM[®] DOORS[®] accelerator product from
River North Solutions

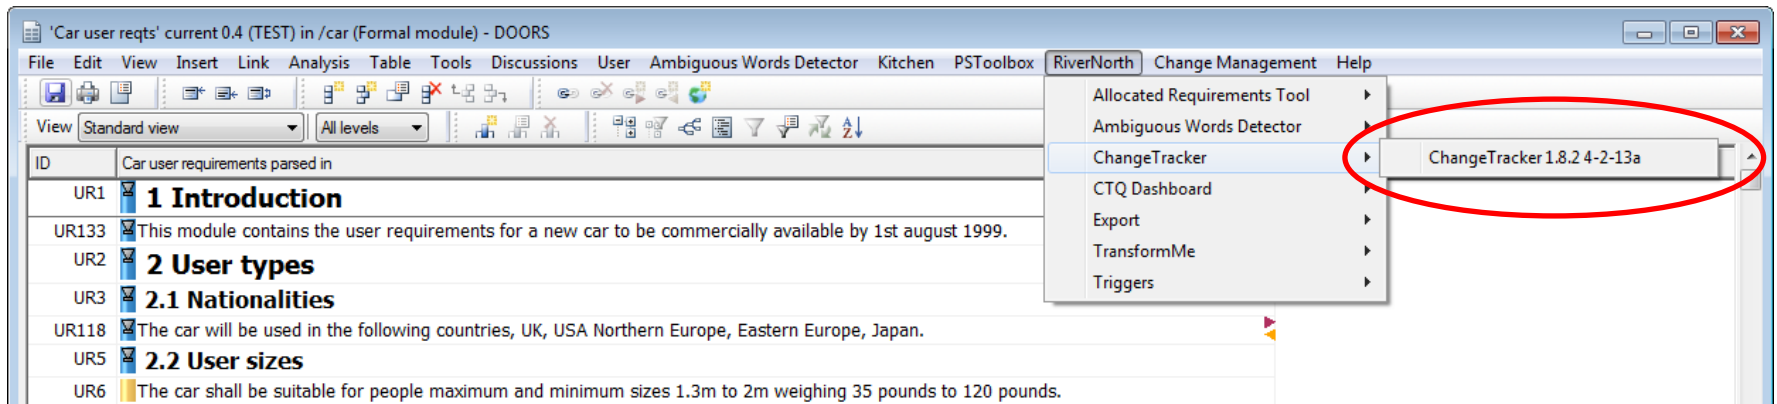

ChangeTracker[™] for DOORS

ChangeTracker[™] provides rich text mark up of revisions to
current version or between baselines; it facilitates review
and approval cycles

- Enables marked up review of current version compared to selected baseline
- Enhanced version of original developed by Telelogic Professional Services
 - Works with all text and string attribute types
- Designed to be used via a central script repository so all DOORS users can access ChangeTracker™'s features
- ChangeTracker™ features
 - Build dynamic history column for any text, string, or enumerated type DOORS attribute
 - Improved code readability and commenting
 - Enhanced error detection and handling
 - Improved user interaction
 - Autopilot Mode that automatically creates several predefined (and admin-configurable) ChangeTracker™ columns with a single click
 - Capability to detect changes in an object and flag a secondary attribute that a change exists – useful with a Rational Publishing Engine integration that simulates Microsoft Word-style change bars in the left margin

- Script creates a ChangeTracker™ column
- Column uses rich-text markup to show changes to a user-selected attribute
- Changes are with respect to user-selected baselined version
- Font formatting used to mark up changes in text is user selectable
- ChangeTracker™ column can display content...
 - For only objects that have changes, or
 - For all objects
- Note: Script does not identify changes to fonts or deleted or moved objects as changes

- Launch ChangeTracker™ from DOORS module drop-down addins menu

- Make selections in user interface
 - Which attribute to compare
 - Which baseline to compare

The screenshot shows the ChangeTracker - DOORS application window. The window title is "ChangeTracker - DOORS". The main text area contains the following information:

This tool creates a new column in the current view that uses formatting to show changes to a user-selected Text, String or Enumeration attribute compared to a baseline.

It is important to note that this script only operates within the context of the current view. Any layout DXL columns created will be lost if not saved into a view.

Autopilot Mode automatically creates ChangeTracker columns for Object Heading and Object Text.

Autopilot Mode Set SideBar Reset SideBar

Manual Mode Attribute: **Object Text**

Choose a Baseline to Compare

0.3 DEMO

0.4 TEST

Formatting for Marking Changes

Inserted text: Bold Italic Underline StrikeThrough

Deleted text: Bold Italic Underline StrikeThrough

Column Details

Create: Layout DXL column DXL attribute

Only show changes: No Yes

Limit Comparison for Better Performance

Maximum characters of text to compare: 2000

Buttons: Create, Close

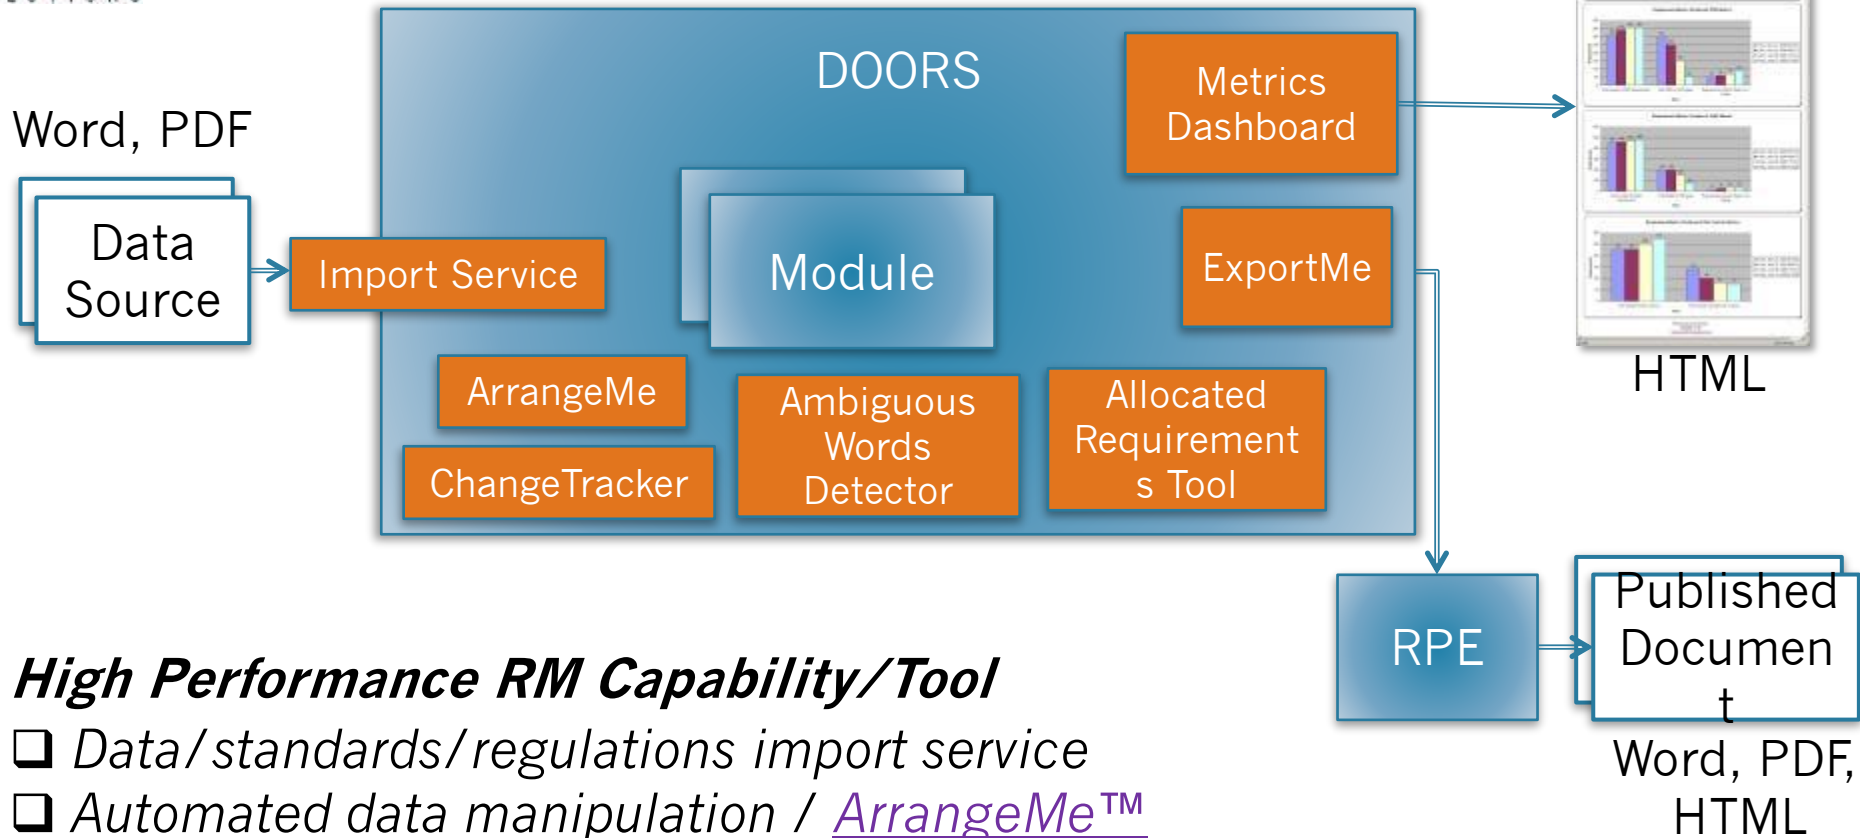

- ChangeTracker™ dynamic history column appears in module displaying changes

The screenshot shows the ChangeTracker application interface. The main window displays a table of user requirements (UR) for a car module. A red circle highlights the 'Object Text Dynamic History attribute from 0.4 (TEST)' column, which shows the history of changes for each requirement.

ID	Car user requirements parsed in	Object Text Dynamic History attribute from 0.4 (TEST)
UR1	1 Introduction	
UR133	This module contains the user requirements for a new car to be commercially available by 15th July 2013.	This module contains the user requirements for a new car to be commercially available by 1st15th augustJuly 1999 2013.
UR2	2 User types	
UR3	2.1 Nationalities	
UR118	The car will be used in the following countries: UK, USA, Northern Europe, Eastern Europe, Japan and China.	The car will be used in the following countries; UK, USA, Northern Europe, Eastern Europe, Japan <u>and</u> <u>China</u> .
UR5	2.2 User sizes	
UR6	The car shall be suitable for people maximum and minimum sizes 1.3m to 2m weighing 35 pounds to 350 pounds.	The car shall be suitable for people maximum and minimum sizes 1.3m to 2m weighing 35 kilogramspounds to 120 350 kilogramspounds .
UR7	3 Requirements	

River North Accelerator Tools for Requirements Management & Document Publishing

High Performance RM Capability/Tool

- Data/standards/regulations import service
- Automated data manipulation / [ArrangeMe™](#)
- Boost requirement quality, reduce churn / [Ambiguous Words Detector™](#)
- Automated, simplified, consistent document publishing / [ExportMe™](#)
- Monitor leading indicator trends / [Metrics Dashboard™](#)
- Display revision markup using rich text / [ChangeTracker™](#)
- Reuse requirements / [Allocated Requirements Tool™](#)

River North Profile – Industries/Clients*, Products

- **Aerospace & Defense**
 - Aerojet Rocketdyne
 - Boeing
 - Collins Aerospace
 - Crane Aerospace

 - Chamberlain
 - HP Enterprise Services

DOORS Classic Accelerator Products from River North

- *Ambiguous Words Detector™ (AWD)* – boosts requirement quality by automatically detecting ambiguous words in DOORS
- *ArrangeMe™* – automated DOORS data manipulation/movement
- *Requirement Metrics Dashboard™ (RMD)* – automated metrics production for DOORS
- *ChangeTracker™* – revision markup displayed using rich text in DOORS
- *ExportMe™* – document publishing automation taken to a new level in DOORS
- *Allocated Requirements Tool™ (ART)* – facilitates requirement reuse in DOORS
